

CLIENT PROFILE

The Danville Area Chamber of Commerce was founded in 1948 to serve the business communities of Alamo, Blackhawk, Danville, Diablo, California.

The Chamber is comprised of 4 professional staff, a Board of Directors comprised of 15 business representatives and approximately 700 business, non-profit and service organizations. The Chamber of Commerce services its community through education, promotion and advocacy.

SITUATIONAL ANALYSIS

Was contacted and referred to the Board because of Franklin Management Systems' accounting and financial expertise working with nonprofits and community boards.

The Chamber of Commerce outsourced all of their accounting and finance management requirements, but were dissatisfied with the results, and expressed an interest in making a change.

PROCESS & SOLUTION

Franklin Management Systems evaluates the current practices and the financial history of an organization, before making any suggestions about changes and/or differences. Once the audit was complete, FMS approached the board with its recommendations. In 2008, FMS was retained by the Danville Chamber of Commerce's to serve as the Coc's *Accounting Department* providing services such as bookkeeping, payroll, financial statement generation and maintenance.

RESULTS

Stable. Rode out the recession and came out healthy. Organization is a growing, thriving, entity. Ongoing maintenance and monitoring.
